**The Alumni**

**Distinguished Lectureship**

This Award has been created by Chemistry's friends and alumni to bring prominent scientists to visit the Department and tell us of their research. During their visit, these scientists will either present a series of lectures or participate in a regular instructional program in the Department and will interact with faculty and students in a collegial atmosphere.

### “Functional Metal-Organic Framework Materials”

4:10 pm, Room 138  
Chemistry Building – MSU

Joseph Hupp holds a Morrison Professorship in the Department of Chemistry at Northwestern University and a senior scientist appointment in Materials Science Division at Argonne National Lab. He also serves as an Associate Editor for the *Journal of the American Chemical Society*. Prior to joining NU in 1986, he earned a B.S. degree from Houghton College and a Ph.D. from Michigan State. He did postdoctoral work at the University of North Carolina. His research accomplishments have been recognized most recently by awards from the Electrochemical Society, the Inter-American Photochemical Society, and the U.S. Department of

Defense. He has mentored more than 40 students to Ph.D. completion. His current research is focused on photochemical energy conversion and on the design and synthesis of functional molecule-derived materials.
